

Why Choose Cyprus West University?

Cyprus West University, or CWU, offers international students an affordable study option in Northern Cyprus. It provides internationally focused programmes, mainly taught in English, together with substantial tuition fee scholarships and a supportive learning environment. World Student Advisors is an official university partner and can support students from initial enquiry through to preparing for their studies.

Why CWU?

CWU is a modern university located in Northern Cyprus. The podcast presents it as an alternative for students looking beyond the traditional international study destinations, combining accessible tuition fees with the experience of living and studying in a Mediterranean environment.

Cyprus has a warm climate, distinctive landscapes and a long history. For international students, this offers the opportunity to combine university study with life in a Mediterranean setting.

Undergraduate Programmes

Within the Faculty of Engineering and Architecture, CWU offers three undergraduate programmes taught in English: Computer Engineering, Information Systems Engineering, and Electrical and Electronics Engineering.

The Faculty of Economics, Administrative and Social Sciences offers Civil Aviation Management, Business Administration, Tourism and Hotel Management, Logistics, and Psychology. Most are taught in English, while Psychology is available in either English or Turkish.

Postgraduate Study and Intakes

For postgraduate students, CWU offers a Master of Business Administration, or MBA, taught in English.

There are three study periods during the academic year. Autumn Semester enrolment is in September, Spring Semester enrolment is in January, and Summer School enrolment is in June and July. Full academic calendar details are available from the university, and WSA can help students identify the appropriate intake and application timetable.

Tuition Fees, Scholarships and Living Costs

The podcast gives the following annual tuition fees and 50 per cent scholarships. All figures are in US dollars:

Study level	Standard annual tuition fee	Scholarship	Tuition fee after scholarship
Undergraduate	\$5,500	50%	\$2,750
Postgraduate	\$6,000	50%	\$3,000

Estimated living costs are approximately \$7,200 per academic year, although actual costs will depend on the student's lifestyle. WSA will confirm the current tuition fee and any scholarship applicable to the student before a final decision is made.

Student Visa and Residence Requirements

Visa and entry requirements vary according to nationality. Students may need a valid passport, university documentation and a completed visa application, and some applicants may need to apply through a Turkish Embassy or Consulate and attend an interview.

Students should begin the process well before travelling. After arrival in Northern Cyprus, international students may also need to complete local registration and obtain a student residence permit. WSA will help students understand the process that applies to them and direct them to the latest official guidance.

Payments

Tuition fees are paid by bank transfer. For security, students should always confirm the university bank details with WSA before transferring any money and use their student application number as the payment reference.

Your WSA Student Counsellor

Manet Khamayo is WSA's dedicated Student Counsellor for Cyprus West University. She has a Bachelor's degree in Business Management and specialist knowledge of study opportunities at CWU. She can support students from their initial enquiry and application through to preparing for their studies.
